#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Inventorship*

1. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

### *Claim Rejections - 35 USC § 112*

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 56 recites the limitation "the document" in line 3. There is insufficient antecedent basis for this limitation in the claim.

### *Claim Rejections - 35 USC § 102*

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. **Claims 56 and 57** are rejected under 35 U.S.C. 102(b) as being anticipated by Hayashi et al (Pub. No.: 2001/0046081 A1).

With respect to **Claim 56**, Hayashi teaches a method of document retrieval using an internet, the method comprising from a telecommunications appliance (*column 46, lines 39-41; column 39, lines 41-47; note that the method of document retrieval is equivalent to an electronic catalog*), ordering a document over the internet, downloading the document from the internet into the telecommunications appliance (*column 46, lines 43-46*), and displaying the document on a display associated with the telecommunications appliance by forming an image of the document on a pixel array of a rewritable bi-modal molecular colorant (*column 46, lines 46-51; column 29, lines 35-40; See figures 20A and 20B*).

With respect to **Claim 57**, Hayashi teaches a method of doing business with respect to document publishing and retrieval (*document publishing and retrieval is equivalent to an electronic newspaper: column 38, line 43, electronic book and magazine: column 39, line 10, or an electronic catalog with input means: column 39, line 41*), the method comprising providing a wireless communications site including a server for publishing document content (*column 38, lines 41-48; note that the wireless communications site is either the satellite broadcasting center or the site where information from the internet is transmitted; please note that Hayashi inherently teaches a wireless communications site including a server because a server serves the purpose of providing or storing information*); and downloading from the site to a wireless telecommunications appliance document content data for read-only display (*note that the appliance is read-only because the electronic newspaper (column 38, lines 49-56) can only receive information and cannot transmit*) by forming a selectable page-by-page pixel array on a

bi-modal molecular colorant display associated with the appliance (*column 46, lines 46-51; column 29, lines 35-40; See figures 20A and 20B*).
